**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (currently amended): A dual chamber nursing bottle comprising:

a first chamber;

a second chamber;

attachment means connecting said first chamber and said second chamber;

valve means mounted on said attachment means with said valve means communicating between said first and said second chambers, said valve means having a first position normally closed for preventing a fluid in said second chamber from entering said first chamber and a second position requiring human activation for opening to allow flow of said fluid from said second to said first chamber, said valve means comprising a radially oriented projecting portion disposed outwardly through a single aperture in a wall of said attachment means; and

a nursing nipple mounted on said first chamber.

Claim 2 (original): The dual chamber nursing bottle as claimed in Claim 1 wherein said attachment means comprises threaded closure means.

Claim 3 (original): The dual chamber nursing bottle as claimed in Claim 1 wherein said valve means comprises a flexible member.
